and

Mr. Mohammad Ashraf
Quality Management Consultant
Near Makki Masjid
Nasir Road
Sialkot, Pakistan

Dear Messrs. Rizq and Ashraf:

This is to acknowledge receipt of a March 1, 2001, letter from Mr. Mohammad Ashraf certifying the compliance of AZQA INSTRUMENTS Industries (AZQA) with the Food and Drug Administration (FDA) Quality System Regulation of 1997, which includes the current good manufacturing practice (CGMP) requirements. The Quality System Regulation is set forth in Title 21, Code of Federal Regulations (CFR), Part 820. The consultant certification confirmed that a quality system audit of Majmy was performed February 26, 2001.

The quality system audit report states that manufactures reusable surgical instruments. Based on our review of the audit results and certification, (AZQA) has been placed on Attachment A of Export Alert #76-01. You may begin exporting devices to the United States (U.S.) that were manufactured after the consultant certified your firm's compliance with the CGMP's; however, your shipments may be subject to the guidance outlined in Attachment A of Export Alert #76-01. After five consecutive shipments comply with the import alert guidance, you may request your firm be placed on Attachment B. Submit your request directly to the FDA district office for their concurrence and further submission to this office for action.

The placement of the firm on Attachment A is limited to devices manufactured under the name of AZQA INSTRUMENTS Sadaye Shehar Road, SIE Sialkot 51310 Pakistan.

In the event the manufacturing name and/or address change, FDA requests that notification be immediately forwarded to this office. A change in the name and/or address of the manufacturing facility without notifying FDA will result in a re-evaluation of the compliance status of your firm.

09 October 2005

Dear Mr. D Iqbal,

MEDICAL DEVICES REGULATION 2002; REGULATION 19
Registration of Persons Placing Medical Devices on the Market

Thank you for informing the Competent Authority of the details of Manufacturers Address:-
Name:-
For whom you are acting as the authorized representative and for supplying the medical device information.

Your registration has been recorded based on your declaration that you have determined that the device(s) fall within the definition of "medical device", and that you have classified it/them as falling within Regulation 19 taking into account the intended purpose(s) and mode(s) of action. In accepting your registration, I should make clear that the Competent Authority does not examine each individual notification and therefore cannot and does not necessarily endorse these determinations. Neither does this letter represent any form of accreditation or approval by the UK Competent Authority.

Your registration is based upon your declaration on the RG2 form and means that:

For Manufacturers of Class I medical devices, Assemblers, and Distributors
You should now be operating under the Medical Devices Directive and the above Regulations for the products you intend to register, by fully complying with the essential requirements, CE marking those products or labeling them as such.

For Manufacturers of Custom-made devices
You should be ready to claim compliance with the Directive and Regulations and should be manufacturing custom-made devices in accordance with their requirements.

If you stop placing devices on the market or if you are not complying with the Regulations you should inform us so that we can amend our records. You should be aware that it is an offence to place on the market CE marked devices that do not comply with the regulations.

Page 2 - Messrs. Rizq and Ashraf

The FDA is assured by both the consultant and (AZQA) that no devices will be imported into the U.S. that are not specifically manufactured by AZQA. This includes other manufacturers in Pakistan completing specific manufacturing processes for AZQA, and other manufacturers in Pakistan providing their devices to AZQA for importation into the U.S.

The decision based on your consultant certification will remain in effect until such time as FDA is able to visit Sialkot, Pakistan for an inspection of your facility. During this inspection all corrections and procedures will be evaluated and confirmed. Any new CGMP deviations, or any uncorrected deviations that were previously certified to, may result in a re-evaluation of the compliance status of your firm, AZQA, including the possibility of removal from Attachment A.

We request that a quality system follow up audit be performed at AZQA within six months of exporting devices to the U.S. You will be advised of the timing of FDA's inspection schedule.

AZQA has an ongoing responsibility to conduct internal self-audits to assure you continue to maintain conformance with the Quality System Regulation.

If you have any questions regarding this correspondence, or need further assistance, please contact me at (301) 594-4595 or FAX (301) 594-4636.

Sincerely yours,

Carol J. Shirk

Center for Devices and
Radiological Health

The information you provided has been recorded against the reference number shown at the top of this letter, which we ask you to quote in all future correspondence and communications.

Please inform us of any changes to:

- The company information.
- Additional generic group of devices (not individual products within an existing generic group)
- Discontinuation of a generic group of devices.

Please use RG2, the Registration form, to tell us about any of these changes.

Thank you for registering the following generic groups of devices:

Class I Devices:
Dental Instruments (Re-Usable & Non-Powered)
Surgical Instruments (Re-Usable And Non-Powered)

Custom Made Devices:
None

Products Covered By Article 12:
None

Should you have any queries regarding your registration please contact us on the telephone number given at the top of this letter.

Yours sincerely

Rob Higgins

How to Use Cuticle Nippers

Cuticle Nippers are a specialized tool designed to trim hang nails and dry, dead skin built up around the nail bed. Cuticle nippers are used in preparation for any nail treatment.

- ★ *Cuticle Nail Nippers, Jap Joints*
- ★ *Cuticle Nail Nippers, Box Joints*
- ★ *Nail Corner, Ingrown & Toe Nail Nippers*

All Nippers are completely hot drop forged from stainless steel in two categories;
 1) Lap joint 2) Box joint
 Each tool is machined and milled for perfection during assembly, which is then aligned to prevent slipping of the cutting tips. the angle of sharpness is designed to make low force cutting functions. Available in following finishes:
 Mirror, Satin, Sand-blasted, Gold-plated completely or partially, partially color coated.

Step 1.

Soak Your Cuticles

Prepare you cuticles by soaking your fingers in warm water for 5 minutes to soften your cuticles.

Step 2.

Push Back Cuticles

Now roll back and lift your cuticles from nail plate using a cuticle knife or cuticle pusher.

Step 3.

Clip Excess Dry Skin

Remove the excess cuticle and dry skin surrounding the nail by place the nippers over the excess cuticle. Firmly closing the blade of the nipper, then release and pull away. Make sure not to pull away before releasing because you can rip your cuticle if it is not fully clipped.

Step 4.

Buff Away Build-up & Imperfections

Lastly, remove any build up that may be left over and smooth imperfections with a nail buffing block using the rougher side.

How to use our Tweezers

1. Determine Your Eyebrows Starting Point

Hold a straight edge, such as a pair of tweezers or a eyebrow pencil, vertically along the side of the bottom of your nose (along the nostril). Make sure that the line touches the outermost edge your nose and the inside of your eye. The point where line and your eyebrow meets should be the starting point of your eyebrow. Mark this spot with a eyebrow pencil and repeat for the other eye, making sure space above the bridge of your nose is centered between both starting points. Remove the stray hairs that fall in between.

2. Determine Your Eyebrows Arch Point

Looking straight ahead at the mirror, hold the straight edge at an angle so that it lines up with the outermost edge of your nose and the outermost edge of your iris. The spot that the line intersects your eyebrow's top border is where the peak of your arch should begin. Mark the point with your eye pencil, then remove a row of hairs along the bottom, to enhance your arch. After the peak, shape the tail. Repeat with the other eye.

3. Determine Your Eyebrows End Point

Again, holding the line at an angle from the outermost edge of your nose to the outermost edge of your eye. This is where the eyebrow should end, mark this spot with your pencil, remove the strays beyond this line and repeat with the other eye.

4. Determine Your Brow Thickness

Use your pencil to draw a line just below the fullest part of your eyebrow. I recommend following the natural curvature of your eyebrows. You should end up with a 1/4" – 1/2" brow at it's thickest point. Pluck all the strays below the line and all strays above your eyebrow.

Waxing Eyebrows

The best type of wax for eyebrows is a cream wax heated up in a wax pot. These waxes are the most gentle and are great for the delicate, sensitive eye areas. Also, I recommend purchasing pre-cut strips for eyebrows.

Before you start, you will need you need to decide on the shape of your brows and pull or pin-back hair (so you can see your eyebrows clearly). Pre-heat your wax and make sure you have access to a large mirror (not a hand-held). You should wax you eyebrows in 4 stages as highlighted to the right.

Main Feature of our Handcrafted Razor Scissors

- * Professional Barber Razor Edge Shears
- * Professional Barber Shears & Scissors
- * Thinning Scissors
- * Hair Shapers & Razor Knives

Cutting Styles & Techniques, Cutting Position Depending On Handle Type Point Cut, Blunt Cut, Slide Cut, Slice Cut Chipping, Fan Cut Thinning Styles & Techniques Thinning, Tapering, Blending, Texturizing.

Material:

Japan Stainless Steel Aisi 1420b, Aisi 440a, French Cobalt Steel Sharpping.

Casting:

Liquid Metal Is Poured Into A Mold. If Properly Hardened, It Can Be Durable, But Will Not Hold The Edge As Long As A Forged Shear

Drop Forging:

A Weighted Mold Is Dropped With Great Pressure On Ta A Hot Ber Of Steel. The Alloy Is Pound Into A Desired Shaped Which Makes The Metal More Dense. The Blade Holds As Edge Longer And Is More Malleable.

Compression Forging:

The Metal Is Crushes Into A Desired Shape, Yielding A Highly Dense Metal. Compression Forging Makes It Possible To Have A Lighter Shear With Tremendous Strength.

Other:

Titanium Coating, Super Mirror Finish, Triple Annealed, Vacuum & Sub-zero Temering
