APR 16 2019

Mr. Muhammad Rizq
Chief Executive
AZQA INSTRUMENTS
Sadaye Shekar Road,
SIE Sialkot
51310 Pakistan

and

Mr. Mohammed Ashraf
Quality Management Consultant
Near Hakkal Masjid
Nasir Road
Sialkot, Pakistan

Dear Messrs. Rizq and Ashraf:

This is to acknowledge receipt of a March 1, 2019, letter from Mr. Mohammed Ashraf certifying the compliance of **AZQA INSTRUMENTS Industries (AZQA)** with the Food and Drug Administration (FDA) Quality System Regulation of 1997, which includes the current good manufacturing practice (CGMP) requirements. The Quality System Regulation is set forth in Title 21, Code of Federal Regulations (CFR), Part 820. The consultant certification confirmed that a quality system audit of Hajmoy was performed February 28, 2019.

The quality system audit report states that manufactures responsible surgical instruments. Based on our review of the audit results and certification, **AZQA** has been placed in Attachment A of Import Alert #76-01. You may begin exporting devices to the United States (U.S.) that were manufactured after the consultant certified your firm's compliance with the CGMP; however, your shipments may be subject to the guidance outlined in Attachment A of Import Alert #76-01. After five consecutive shipments comply with the import alert guidance, you may request your firm be placed on Attachment B. Submit your request directly to the FDA district office for their concurrence and further submission to this office for action.

The placement of the firm on Attachment A is limited to devices manufactured under the name of **AZQA INSTRUMENTS Sadaye Shekar Road, SIE Sialkot 51310 Pakistan**.

In the event the manufacturing name and/or address change, FDA requests that notification be immediately forwarded to this office. A change in the name and/or address of the manufacturing facility without notifying FDA will result in a re-evaluation of the compliance status of your firm.

19 October 2018

Dear Mr. D Iqbal,

MEDICAL DEVICES REGULATION 2002: REGULATION 19
Registration of Persons Placing Medical Devices on the Market

Thank you for forwarding the Competent Authority of the details of Manufacturers (None) - for whom you are acting as the authorized representative and for supplying the medical device information.

Your registration has been recorded based on your declaration that you have determined that the device(s) fall within the definition of "medical device", and that you have classified it/them as falling within Regulation 19 taking into account the intended purpose(s) and mode(s) of action. In accepting your registration, I should make clear that the Competent Authority does not examine each individual notification and therefore cannot and does not necessarily endorse these determinations. Neither does this letter represent any form of accreditation or approval by the UK Competent Authority.

Your registration is based upon your declaration on the R12 form and states that:

For Manufacturers of Class I medical devices, Accessories, and Spare Parts:
You should now be operating under the Medical Devices Directive and the above Regulations for the products you asked us to register, to fully complying with the essential requirements, CE marking those products or labeling them as such.

For Manufacturers of Class II medical devices:
You should be ready to claim compliance with the Directive and Regulations and should be conducting systematic device in accordance with their requirements.

If you are placing devices on the market or if you are not complying with the Regulations you should inform us so that we can amend our records. You should be aware that it is an offence to place on the market CE marked devices that do not comply with the regulations.

An Executive Agency of the Department of Health

Certificate of Registration

The Governing Board of
Q.A. International Certification Limited
hereby grants to:

AZQA INSTRUMENTS
Registration No. QAC / PC / 1815 - A

Hereafter called the Registered Company the right to be listed in the Directory of Registered Companies in respect of the services listed below. Page 2 - Messrs. Rizq and Ashraf

The FDA is assured by both the consultant and **AZQA** that no devices will be imported into the U.S. that are not specifically manufactured by **AZQA**. This includes other manufacturers in Pakistan completing specific manufacturing processes for **AZQA**, and other manufacturers in Pakistan providing their devices to **AZQA** for importation into the U.S.

The decision based on your consultant certification will remain in effect until such time as FDA is able to visit Sialkot, Pakistan for an inspection of your facility. During this inspection all corrections and procedures will be evaluated and confirmed. Any new CGMP deviations, or any uncorrected deviations that were previously certified to, may result in a re-evaluation of the compliance status of your firm, **AZQA**, including the possibility of removal from Attachment A.

We request that a quality system follow up audit be performed at **AZQA**, within six months of exporting devices to the U.S. We will be advised of the timing of FDA's inspection schedule.

AZQA has an ongoing responsibility to conduct internal self-audits to assure you continue to maintain conformance with the Quality System Regulation.

If you have any questions regarding this correspondence, or need further assistance, please contact me at (301) 594-4595 or FAX (301) 594-6636.

Sincerely yours,

Carol Z. Shirk

Aurigan

Ai-546
Reining Horse Bit
12,5 cm
If your horse likes a snaffle,
but his mouth is feeling
numb, try this three piece
snaffle. It breaks over the
bars in a different place
creating a new feel. The
copper roller keeps the
mouth moist for a better feel.

Exotic Animal Surgical Kit
Kit includes:

- (1) Scissors, Surgical, 5.5"
- (1) Instrument Case, Sterilizing Boxes (with silicon Pads)50x152mm
- (1) Retractor, ALM Self-Retaining
- (1) Forceps, Dressing 12.5 cm straight
- (1) Scissors, Iris, 11 cm, straight tungsten carbide blades
- (1) Needle Holder, Olsen Hegar, with suture scissors
- (1) #3 Scalpel handle
- (1) Forceps, Micro Adson 12 cm
- (2) Forceps, Mosquito 3.5" curved
- (2) Forceps, Hartman Mosquito 3.5"

Ai-749

Mouse Vessel Cannulation Kit

- Instrument Case, Sterilizing Boxes (with silicon Pads)50x152mm
- Dumont Tweezers #5
- Vannas Scissors
- Alm Self-Retaining Retractor
- Fine, Serrated Forceps
- MicroFil, 28 gauge
- Vessel Cannulation Forceps, 0.5 mm Diameter

Ai-750

General Surgery Basic Kit
Kit includes:

- (1) #3 Scalpel handle
- (1) Mayo scissors, 6.75", straight
- (1) Snook ovariotomy, 7"
- (3) Mosquito hemostatic forceps, 5", curved
- (2) Kelly hemostatic forceps, 5.5", straight
- (1) Metzenbaum scissors, curved, 7"
- (1) Brown-Adson forceps, 7x7 teeth
- (4) Rochester Carmalt forceps, 6.25", curved
- (4) Backhaus towel clamps, 5.25"
- (1) Olsen Hegar needle holders, 5.5"
- (1) Sterilization case

Ai-751

Rat Dissecting Kit

- Dumont Tweezers #5
- Alm Self Retaining Retractor
- Vannas Scissors
- Needle Holder
- Iris Forceps, Curved, Serrated
- Blunt Probe, 1.0 mm Diameter
- SuperCut Iris Scissors, Straight, 10 cm

Ai-752

Feline Spay Pack
Kit includes:

- (2) Kelly forceps, 5.5", curved
- (2) Kelly hemostatic forceps, 5.5", straight
- (2) Mosquito hemostatic forceps, 5", curved
- (2) Mosquito forceps, 5", straight
- (3) Jones towel clamp, 3.5"
- (1) Dressing forceps, 5.5"
- (1) #3 Scalpel handle
- (1) Adson Brown forceps, 4.75"
- (1) Mayo scissors, 6.75", straight
- (1) Mayo-Hegar needle holder, 6.75"
- (1) Olsen-Hegar needle holder, 6.5"
- (1) Snook ovariotomy, 7"

Ai-753

Micro-surgical Kit
Kit includes:

- (1) Tweezers, Dumont #5, 11cm non-magnetic stainless steel
- (1) Scissors, Spring, 14 cm curved
- (1) Needle Holder, Castroviejo 14 cm
- (1) Scissors, Tenotomy, 10 cm straight
- (1) Instrument Tray, autoclavable
- (2) Forceps, Micro Hemostatic, 12.5 cm, curved
- (1) Knife Handle, Round Knurled
- (1) Blades, Miniature Edge 12-pack
- (1) Probe, 14 cm, stainless steel (not pictured)
- (1) Retractor, Weitlaner, 10.8 cm

- G Incisor Luxator 5mm
- H Curettes

Veterinary Winged Dental Elevators

winged elevators are light-weight yet extremely durable. The sharp, tapered winged tip allows easy insertion into the PDL. The width of the winged tips have been shaped to match the size and shape of the tooth's root structure (sizes 1-6 mm). This unique winged shape increases control of the instrument and provides additional leverage to aid in extraction of the tooth.

Ai-792

Winged Elevators with Standard Handle

Winged Elevator 1mm

Winged Elevator 2mm

Winged Elevator 3mm

Winged Elevator 4mm

Winged Elevator 5mm

Winged Elevator 6mm

Straight Root Tip Pick

Used for assisting with extraction of retained root tips or root fragments.
Straight Root tip pick - stubby handle

Periosteal Elevator

Used for elevating the muco-periosteal flap during extractions on large breed dogs.
Periosteal Elevator - stubby handle

Winged Elevators with Stubby Handle

The stubby handle elevators available as a 6 pc. set. See page 16

Winged Elevator 6mm

Ai-793

6 pc Stubby Handle Set includes
stainless steel instrument holder/case

AI-794 5pc Luxator instrument set (1-5mm Stubby)

1mm Luxator (Stubby Handle)

2mm Luxator (Stubby Handle)

3mm Luxator (Stubby Handle)

4mm Luxator (Stubby Handle)

5mm Luxator (Stubby Handle)

Luxators

Luxators, sizes 1-5mm are very fine and sharp. The 5 sizes allow their use for both feline and Canine teeth. They are used and recommended by dental specialist's for cutting the periodontal ligament and expanding the alveolus (tooth Socket) and are ideal for incisors and crowded teeth.

The stubby (shorter length and larger diameter) handle makes extraction so much safer as the users fingers can be placed at the instrument tip. Luxators are not elevators, we recommend winged elevators are used to elevate and extract the tooth.

Ai-795

Explorer/Measuring Probe

The probe end has periodontal markings etched in black. The fine but robust tip is ideal for periodontal probing in cats or dogs. The markings will not fade even after many autoclave cycles. The other end of the probe has a shepherd hook explorer to detect tooth defects both supra and subgingivally.

Ai-796

Double Ended Periosteal Elevator

The periosteal elevator is used to lift a muco-periosteal flap off the bone when performing surgical extractions. The fine double-ended 2/4 periosteal elevator is great for cats and small to medium dogs.

Ai-797

Sickle Scaler

This scaler is used to remove plaque and calculus from the tooth surface. The sickle scaler tip can be used to remove calculus from the developmental grooves and blood grooves in canine teeth.

Ai-798

Jaquette Supragingival Scaler

(Above the gum) The scaler is used to remove plaque and calculus from the tooth surface. It works well in tight occlusal spaces.

Ai-799

Subgingival Curette

(Below the gum) The curette is used to clean plaque and calculus from the tooth root surface.

AZQA
INSTRUMENTS

Ai-800

Minnesota Retractor

Used to lift and protect the tissue and the user when performing surgical extractions whilst operating the high speed drill. One end holds the cheek back and the other holds the tongue down, a multi purpose retractor.

Ai-801

Tartar Removing Forceps

The curved beak of the forceps allow for easy removal of heavy calculus from the tooth surface, decreasing the chance of fracturing the tooth.

Ai-802

Extraction Forceps

Extraction forceps are used to grasp the tooth and remove from the socket after it is loosened. The small size and spring in the handle helps prevent excessive force and the risk of breaking the tooth. Overall length 125mm (5").

Ai-803

Root Tip Extraction Forceps

Root tip extraction forceps have grooved tips with fine curved ends that meet when closed. They are ideal for root extraction or as an alternative to regular extraction forceps (D1012). 6" / 150mm.

Ai-804

Fragment Extraction Forceps

Root fragment forceps are ideal for extracting mobile broken root fragments and small, delicate teeth. The grooved and serrated jaws assist with grasping fragments. 5 1/2" / 138mm.

Instruments Specially Designed for Felines and/or Very Small Dogs

Straight Tip Elevators

These super slim elevators are excellent for removing teeth in cats and small dogs. They are also useful in retrieving fractured roots. Tips can be sharpened using a dental stone.

Elevator 1mm

1mm wide straight tip elevator with stubby handle.

Elevator 2mm

2mm wide straight tip elevator with stubby handle.

Probe/Explorer

The probe end has periodontal markings etched in black. The fine but robust tip is ideal for periodontal probing in cats or dogs. The markings will not fade even after many autoclave cycles. The other end of the probe has a shepherd hook explorer to detect tooth defects both supra and subgingivally.

Very Fine Periosteal Elevator

Double ended elevator. The small delicate flat ends of this instrument make it ideal for raising gingival flaps in cats. The rounded tip helps prevent accidental slippage and tearing of the gingival flap.

Resorptive Lesion Probe

This probe can be used to detect resorptive lesions or residual calculus subgingivally. The probe can also be used to identify furcation involvement (loss of alveolar bone between tooth roots).

Sickle Scaler

This double ended hand instrument is used for the removal of supragingival (above the gum) plaque/calculus and stains.

Curette

This slimline curette is ideal for calculus and plaque removal both supra and subgingivally (above and below the gum). The fineness of the instrument is well suited for use in cats and small dogs.

Extraction Forceps

Extraction forceps - small. These fine extraction forceps are designed to grasp small teeth. The spring action allows their use without excessive force being applied to the tooth crown. 125 mm

Ai-805

Instruments mentioned on this page are available as a set .

Curved Deciduous Elevators

The curved deciduous elevators are ideal for the removal of retained canines (milk teeth) and are available in three sizes suitable for the different sized deciduous teeth encountered.

The sharp elevator end cuts the PDL whilst the curve of the elevator tip follows the mesial curve and the other end the distal curve of the root. Curved deciduous elevators make the removal of retained teeth quick and easy because they follow the curve of the root.

Ai-806
Curved Deciduous Elevator – Small (2mm)

Ai-807
Curved Deciduous Elevator – Medium (3mm)

Ai-808
Curved Deciduous Elevator – Large (4mm)

Ai-809
Molt Periosteal Elevator – No. 9

The rounded edge of the periosteal instrument minimise the tearing of tissue when lifting the gum flap. The sharp end makes the initial lifting of the flap easier. Suitable for medium to large dogs.

Ai-810
Small Dog or Cat Right Angle Extraction Forceps

Designed by for easier extraction of cat, small dog and deciduous teeth. Parallel right angle jaws reduce the risk of tooth fracture during extraction. By not meeting at the end, they reduce the risk of breaking off cats teeth. Small handles provide a more tactile feel.

Instrument Sets

Instrument sets take the guess work out of choosing the correct dental instrument. Instruments are used throughout the world in teaching wetlabs and have been developed with the help of veterinary dental specialists. Made from high quality stainless steel, these instruments meet the needs of the modern day veterinarian.

Ai-811

5 Piece Specialised Instrument Set

The set is intended as a supplement to ordinary tooth extraction sets. The curved deciduous elevators are ideal for the removal of retained canines (milk teeth). Each instrument is available individually.

The set consists of:

- Molt Periosteal Elevator - No 9
- Curved Deciduous Elevator - small
- Curved Deciduous Elevator - medium
- Curved Deciduous Elevator - large
- Extraction Forceps, right angled jaw

Ai-812

14 Piece Instrument Set, Standard Handle Elevators

The set consists of:

- Winged elevators Size 1-5mm
- Straight root tip pick
- Tartar Removing Forceps
- Extraction Forceps
- Minnesota Retractor
- Subgingival Curette
- Jaquette Supragingival Scaler
- Sickle Scaler
- Explorer / Measuring Probe
- Double ended Periosteal Elevator
- Each instrument is available individually

Ai-813

14 Piece Instrument Set, Stubby Handle Elevators

The set consists of:

- Winged elevators Size 1-5mm
- Straight root tip pick
- Tartar Removing Forceps
- Extraction Forceps
- Minnesota Retractor
- Subgingival Curette
- Jaquette Supragingival Scaler
- Sickle Scaler
- Explorer / Measuring Probe
- Double ended Periosteal Elevator
- Each instrument is available individually

Ai-814

Feline 8 Piece Instrument Set

The feline periodontal kit has been designed exclusively for use in cats and small dogs. Its design allows the practitioner to perform a complete oral examination (including detection of feline resorptive lesions) and cleaning of all tooth surfaces – both supra and subgingivally. All instruments are available individually.

The set consists of:

- 1 mm Wide Straight Tip Elevator,
- 2 mm Wide Straight Tip Elevator
- Probe/Explorer
- Extraction Forceps
- Periosteal Elevator
- Resorptive Lesion Probe
- Sickle Scaler and Curette.

Ai-815**4 Piece Winged Elevator Set**

Winged Elevator sizes 1-4 mm in standard handle, supplied in a black pouch. Each elevator is available individually.

Standard Handle Set

**Ai-816****4 Piece Winged Elevator Set**

Winged Elevator sizes 1-4 mm in stubby handle, supplied in a black pouch. Each elevator is available individually.

Stubby Handle Set

**Ai-817****6 Piece Winged Elevator Set**

Winged Elevator sizes 1-6 mm in standard handle, supplied in a black pouch. Each elevator is available individually.

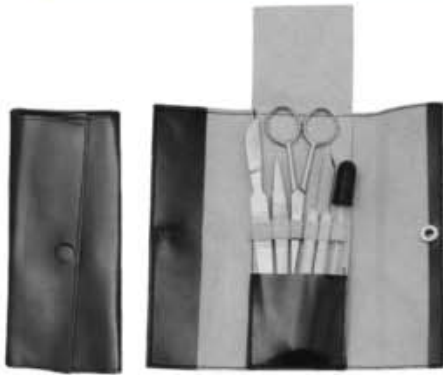

Standard Handle Set

**Ai-818****6 Piece Winged Elevator Set**

Winged Elevator sizes 1-6 mm stubby (shorter length and larger diameter) handle. The stubby handle makes extraction so much safer as the user's finger can be placed at the instrument tip. The new handle design is ideal for small or large hands. Supplied in a black pouch. Each elevator is available individually.

Stubby Handle Set
